RE: Design Center Project Meters and Connections

Dear Mrs. Ayala:

This correspondence is to express the support of the Sand City Community Development Department in authorizing a single main meter for the Design Center Project at 600 Ortiz Avenue. It is this Department's understanding that the water distribution system is an integral part of the entire building's heating system and is engineered to feed off a single meter. It is also understood that this distribution system is capable of monitoring water usage for each of the buildings residential and commercial units. For those reasons, the City supports the Design Center's request for a single street meter.
