## WATER DISTRIBUTION SYSTEM REPORT – WATER YEAR 2012

**Notes:**

1. Information shown is as provided by system owners and operators unless otherwise noted.
2. Methods for reporting production are either Land Use (LU) or Water Meter (WM).
3. The source areas are as follows:  
 AS1 – Upper Carmel Valley – San Clemente Dam to Esquiline Bridge  
 AS2 – Mid Carmel Valley – Esquiline Bridge to Narrows  
 AS3 – Lower Carmel Valley – Narrows to Via Mallorca Bridge  
 AS4 – Via Mallorca Bridge to Lagoon  
 SCS – Seaside Coastal Subareas  
 CAC – Cachagua  
 CVU – Carmel Valley Upland  
 LSS – Laguna Seca Subarea  
 MIS – Peninsula, Carmel Highlands and San Jose Creek areas
4. California American Water (Cal-Am) main system production includes 3,925.3 AF from Seaside coastal wells and 7,514.4 AF from Carmel Valley wells. 179.7 AF of water produced by the former Water West wells in Water Year (WY) 2012 are included in the total for Cal-Am production from Carmel Valley. No water produced by the main system was transferred to the Seaside Municipal Water System in WY 2012. 242.0 AF of potable water were produced by the City of Sand City Desalination Plant, provided to the main system, and are counted here as Cal-Am production. 131.7 AF were provided for injection to ASR Wells #1, 2 and 3 from Cal-Am wells in Carmel Valley, and is not included in the production from Carmel Valley. 1,224.3 AF was ASR recovery from Seaside coastal wells in WY 2012, and that amount is counted here as Cal-Am main system production. No water was diverted from San Clemente Reservoir during WY 2012. Cal-Am’s active connections for the main system include 22 connections for Rancho Fiesta and 435 Water West customers.
5. Cal-Am’s main system deliveries total 10,734.06 AF. This total was derived as shown:

<b><u>Reported Cal-Am Consumption</u></b>	
<b><u>Water Year 2012 (AF)</u></b>	
City Total	7,284.61
County Total	3,279.40
subtotal	10,564.01
CV Irrigation	0.27
PB-LCP	12.58
subtotal	10,576.86
Transfer to Ryan Ranch	20.60
Metered Non-Revenue	11.72
Total	10,734.06

6. N.A. refers to data that are not available and N.R. refers to systems that did not report.
7. The Newsome, ZBES (Belzberg), Dyer, Flores, Pisenti and Carroll Mobile Water Distribution Systems were added in WY 2012. The Reppy WDS consists of one well with specific limits on two separate meters, and so, it appears twice, once as “domestic” and again as “irrigation”. That system and the All Saints WDS represent revisions to the previously approved and amended Bardis WDS. Also, the Monterra Ranch, Cañada Woods North (Upland) and Cañada Woods (Alluvial) WDSs were combined to form the *Cañada Woods Water Company WDS* in 2005, although they are reported separately here to facilitate historical comparisons.
8. The names of Cachagua Road #1 and #2 were switched in Reporting Year 1999 to agree with records of the Monterey County Department of Health. Older District records have the names of these two systems reversed.
9. Bishop Unit is operated by Cal-Am, acquired July 1999.

10. Rancho Fiesta is operated by Cal-Am. The delivered amount (8.7 AF) was all produced by the main Cal-Am system, so that amount has been accounted for in Cal-Am system deliveries. The source of production was AS1 – AS4.
11. Hidden Hills was formerly referred to as Carmel Valley Mutual; annexed to Cal-Am in 1993.
12. The Ryan Ranch Unit is owned and operated by Cal-Am. 20.6 AF produced by wells in Cal-Am's Main System were delivered to the Ryan Ranch Unit in WY 2012.
13. Production from the Monterra Ranch desalination plant was 39.81 AF in WY 2012, but this production was not reported separately as it was originally produced from wells that have been accounted for. However, Monterra Ranch reported consumption (delivery) of 36.79 AF. The difference (24.38 AF) between reported production from wells (73.49 AF) and the sum of reported production through the desalination plant (39.81 AF) and brine discharge (9.30 AF) in WY 2012 represents water produced for non-potable purposes.
