RE: September 16, 2013 meeting, item 16

I find it interesting that with all the expenses being presented to the MPWMD directors, for consultants and other services to the tune of over \$470,000 that the MPWMD is also considering a reclassification of a staff position. The report does not list the costs involved but merely the range being affected. To us commoners, we have no idea what range 38m step e to range 43 step d means. The report does not give a lot of reason other than the general manager adding tasks as to why this person warrants what looks like a significant raise. Does this person possess unique skills or certifications of some sort that is crucial to the MPWMD? I would hope the directors ask the necessary questions and share information with the public as to why the reclassification is needed, before making a decision on this item.
