

**EXHIBIT 27-A**

**Monterey Peninsula Water Management District  
Water Supply Status  
October 1, 2018**

<b>Factor</b>	<b>Oct to Sept 2018</b>	<b>Average To Date</b>	<b>Percent of Average</b>	<b>Water Year 2017</b>
<b>Rainfall</b> (Inches)	13.52	21.14	64%	32.22
<b>Runoff</b> (Acre-Feet)	32,170	67,246	48%	196,291
<b>Storage</b> <sup>5</sup> (Acre-Feet)	26,860	28,070	96%	28,290

**Notes:**

1. Rainfall and runoff estimates are based on measurements at San Clemente Dam. Annual rainfall and runoff at Sleepy Hollow Weir average 21.1 inches and 67,246 acre-feet, respectively. Annual values are based on the water year that runs from October 1 to September 30 of the following calendar year. The rainfall and runoff averages at the Sleepy Hollow Weir site are based on records for the 1922-2017 and 1902-2017 periods respectively.
2. The rainfall and runoff totals are based on measurements through the dates referenced in the table.
3. Storage estimates refer to usable storage in the Monterey Peninsula Water Resources System (MPWRS) that includes surface water in Los Padres and San Clemente Reservoirs and ground water in the Carmel Valley Alluvial Aquifer and in the Coastal Subareas of the Seaside Groundwater Basin. The storage averages are end-of-month values and are based on records for the 1989-2017 period. The storage estimates are end-of-month values for the dates referenced in the table.
4. The maximum storage capacity for the MPWRS is currently 37,639 acre-feet.
