

**EXHIBIT 23-C**

**Monterey Peninsula Water Management District  
Water Supply Status  
May 1, 2019**

<b>Factor</b>	<b>Oct to Apr 2019</b>	<b>Average To Date</b>	<b>Percent of Average</b>	<b>Oct to Apr 2018</b>
<b>Rainfall</b> (Inches)	28.92	20.54	141%	13.42
<b>Runoff</b> (Acre-Feet)	134,060	61,222	219%	27,939
<b>Storage</b> <sup>5</sup> (Acre-Feet)	31,980	31,950	100%	30,770

**Notes:**

1. Rainfall and runoff estimates are based on measurements at San Clemente Dam. Annual rainfall and runoff at Sleepy Hollow Weir average 21.1 inches and 67,246 acre-feet, respectively. Annual values are based on the water year that runs from October 1 to September 30 of the following calendar year. The rainfall and runoff averages at the Sleepy Hollow Weir site are based on records for the 1922-2018 and 1902-2018 periods respectively.
2. The rainfall and runoff totals are based on measurements through the dates referenced in the table.
3. Storage estimates refer to usable storage in the Monterey Peninsula Water Resources System (MPWRS) that includes surface water in Los Padres and San Clemente Reservoirs and ground water in the Carmel Valley Alluvial Aquifer and in the Coastal Subareas of the Seaside Groundwater Basin. The storage averages are end-of-month values and are based on records for the 1989-2018 period. The storage estimates are end-of-month values for the dates referenced in the table.
4. The maximum storage capacity for the MPWRS is currently 37,639 acre-feet.
