

VII. ALLOCATION OF NEW WATER SUPPLY

The Water Allocation Program requires that each new water connection or expansion in use be accounted for so that water production limitations will not be exceeded. Ordinance No. 70, adopted by the District Board on June 21, 1993, ended the moratorium on the issuance of new water connections that was imposed beginning in January 1991, as a result of the Water Allocation Program EIR. Ordinance No. 70 established an allocation of new water that could be used by each jurisdiction from a total of 358 acre-feet per year (AFY) of California American Water (CAW) metered sales, based on 385 AFY of new production capacity from the Paralta Well (see also Section V). Of this 358 AFY total, a District Reserve Allocation for community benefit projects of 15.280 AFY was also apportioned. Thus, a total amount of 342.720 AFY was available for jurisdiction use.

Implementation and Activities During 2005-2006

Since the District ended the moratorium on water permits in August 1993, a total of 290.297 AFY of the 342.72 AFY Paralta Well allocation had been permitted for use by jurisdictions through June 30, 2006, leaving a total of 52.423 AFY remaining, or 15.3 percent of the jurisdictions' Paralta well allocation (**Table VII-1**). Pre-moratorium credits from expired or canceled permits ("pre-Paralta credits") are credited to the appropriate jurisdiction and may be used in addition to the Paralta allocation. Also, credits are available for public use projects.

More detailed information is presented in **Table VII-1**, which provides the status of water allocations to the jurisdictions as of June 30, 2006. The "changes" columns in the table refer to the month of June 2006 only; the "remaining" columns refer to the quantities that are available for use by the jurisdictions according to District rules. Altogether, an estimated 140.871 AFY was available from all sources for jurisdiction use as of June 30, 2006.

As described in Section IV of this report, specific water entitlements associated with funding of the Carmel Area Wastewater District/Pebble Beach Community Services District (CAWD/PBCSD) Wastewater Reclamation Project are identified for areas within the Del Monte Forest pursuant to District Ordinance No. 109. These entitlements are not considered to be water allocations, and are tracked separately.

Table VII-1
