

VII. ALLOCATION OF NEW WATER SUPPLY

The Water Allocation Program requires that each new water connection or expansion in use be accounted for so that water production limitations will not be exceeded. District Ordinance No. 70, adopted by the District Board on June 21, 1993, ended the moratorium on the issuance of new water connections that was imposed in January 1991, as a result of the Water Allocation Program EIR. Ordinance No. 70 established an allocation of new water that could be used by each jurisdiction from a total of 358 acre-feet (AF) of California American Water (CAW) metered sales, based on 385 AF of new production capacity from the Paralta Well (see also Section V). Of this 358 AF total, a District Reserve Allocation for community benefit projects of 15.280 AF was also apportioned. Thus, a total amount of 342.720 AF was available for jurisdiction use.

Implementation and Activities During 2006-2007

Since the District ended the moratorium on water permits in August 1993, a total of 297.997 AF of the 342.72 AF Paralta Well allocation had been permitted for use by jurisdictions through June 30, 2007, leaving a total of 45.723 AF remaining, or 13.3 percent of the jurisdictions' Paralta well allocation (**Table VII-1**). Pre-moratorium credits from expired or canceled permits ("pre-Paralta credits") are credited to the appropriate jurisdiction and may be used in addition to the Paralta allocation. Also, credits are available for public use projects.

More detailed information is presented in **Table VII-1**, which provides the status of water allocations to the jurisdictions as of June 30, 2007. The "changes" columns in the table refer to the month of June 2007 only; the "remaining" columns refer to the quantities that are available for use by the jurisdictions according to District rules. Altogether, an estimated 128.028 AF were available from all sources for jurisdiction use as of June 30, 2007.

As described in Section IV of this report, specific water entitlements associated with funding of the Pebble Beach Reclamation Project are identified for areas within the Del Monte Forest pursuant to Ordinance No. 109. These entitlements are not considered to be water allocations, and are tracked separately.

Table VII-1
